GORILA

INDIC - FEMINIZED - PHOTODEPENDENT

Gorila by Buddha Seeds is a tremendously "animal" strain, in both production and effect. Be careful with this stallion because he doesn't play. Just a few puffs will be enough to leave you stuck on the couch. Its high THC content in the purest style of American genetics will leave you KO in the first "round".

And if its effect is powerful, so are your crops. Your hands will get glued to the huge buds due to the tremendous amount of trichomes it produces. Gorila is pure resin and will cover your plant in a brilliant white blanket.

Cultivation cares are very meager compared to the big volume of the harvest. We are facing a stallion of productivity.

BUDDHA AUTO ZKITT

SATIVA - FEMINIZED - AUTOFLOWERING

For those with a sweet tooth and lovers of sweet genetics, Buddha Auto Zkitt arrives to infuse your palate with a rainbow of fruity flavors. So it's no coincidence that this indica strain is a full-fledged nod to the famous North American Skittles candies. In Buddha Seeds our goal is to revolutionize your taste buds so that your experience is as pleasant as possible. Because who doesn't like sweets?

With Buddha Zkitt we have further enhanced the palette of nuances of these popular American genetics. Notes of berries, mango and grapefruit stand out. An appetizing treat to taste at any time. Unlike the highs of an indica, Buddha Auto Zkitt takes you to a state of serenity and absolute happiness in which you can stay, so comfortable, for a few hours.

Regarding its morphology, this cannabis candy is discreet in height, ideal for indoor SOG crops. It will surprise you with its multiple tight and resinous buds with a strong sweet aroma. Indoor will be the closest thing to a candy store! Of course, we recommend a minimum curing of one month, so that you can appreciate this rainbow of flavors in its maximum splendor.
